

Jarvis 2: Supported Voice Commands

Jarvis 2 is a Python-based desktop voice assistant for Windows. It supports a wide range of productivity, information, and automation commands via natural voice interaction.

Information & Search

- Search Wikipedia for [topic]

Example: Search Wikipedia for Elon Musk

(Reads a summary from Wikipedia)

- Search YouTube for [query]

Example: Search YouTube for Python tutorials

(Opens YouTube search in your browser)

- News

(Reads top news headlines)

- Weather

(Jarvis will prompt for a city, e.g., "Weather" → "Which city?" → "London")

System & Utilities

- System information

(Reports CPU and memory usage)

- Battery status

(Reports battery percentage and charging status)

- Check internet speed
(Reports download and upload speeds)

Calculator

- Calculate [expression]

Examples:

- Calculate 12 * 7
- Calculate 2 + 2
- Calculate (5 * 6) / 2

(Performs the calculation and speaks the result)

File & Application Management

- Open [application]

Examples:

- Open chrome
- Open spotify
- Open visual studio code
- Open notepad

(Jarvis will search your installed apps and open the best match)

- Create folder [name]

Example: Create folder MyDocs

(Creates a folder in your user directory)

- Delete temporary

(Deletes files in your TEMP folder)

Reminders & Alarms

- Remind me to [task]

Example: Remind me to call mom at 5 PM

(Adds a reminder to a file)

- Alarm

*(Sets an alarm; you will be prompted for the time, e.g., "7:44 p.m."
or "19:44")*

Games & Fun

- Play rock paper scissors

(Plays a game with you)

- Play quiz

(Starts a quiz with 5 random questions from a large pool)

WhatsApp Messaging

- Send WhatsApp message

or

WhatsApp

*(Jarvis will prompt for the phone number and message, then send via
WhatsApp Web)*

Voice Modes

- Silent mode

(Disables voice output)

- Whisper mode

(Speaks at a lower volume)

- Normal mode
(Restores normal voice output)

Session Control

- Exit
or
Stop
(Closes Jarvis)

Summary Table

Command Example	Description
Search Wikipedia for Elon Musk	Reads Wikipedia summary
Search YouTube for Python tutorials	Opens YouTube search in browser
News	Reads top news headlines
Weather	Asks for city, reports weather
System information	CPU and memory usage
Battery status	Battery percentage and charging status
Check internet speed	Reports download/upload speeds
Calculate 2 + 2	Calculates and speaks result
Open chrome/spotify/notepad/word/...	Opens the named installed application
Create folder MyDocs	Creates folder in user directory
Delete temporary	Clears TEMP folder
Remind me to call mom	Adds a reminder
Alarm	Sets an alarm
Play rock paper scissors	Plays game

Play quiz	Starts a quiz (5 random questions)
Send WhatsApp message / WhatsApp	Prompts for number/message, sends via WhatsApp
Silent mode/Whisper mode/Normal mode	Changes voice output mode
Exit/Stop	Exits Jarvis

You can say these commands after starting and authenticating with Jarvis. If you want even more, simply add them to the `handle_command` function in your code!

For further customization or to add more commands, refer to the `handle_command` function in your project code.
